

RE: Patient Name: _____ D.O.B. _____

Dear Provider:

Greetings from InHealth Specialty Pharmacy! We are a pharmacy that provides custom compounding, headquartered in Fargo, ND. We compound medications for the following specialties: Sterile Compounding, Dermatology, Veterinary, Pain Management, Sports Medicine and Bio-Identical Hormone Replacement (BHRT). One of the aspects of our services is to help women understand their hormones and menopause symptoms. Your patient attended our Tuesday noon seminar entitled "***Hormone Imbalance: What Every Woman Needs to Know***". At the seminar, a pharmacist that specializes in BHRT went over the following information: events of a women's normal menstrual cycle, functions of the female hormones, age-related hormone levels, options for hormone balance, and healthy living strategies.

There is a vast array of Hormone Replacement options available to women. It is very important that patients understand their options, become educated on their choices, and discuss their options in great detail with their provider. At InHealth Specialty Pharmacy (IHSP), we recognize that as your patients's healthcare provider, the final decision to implement therapy is up to you and the patient. This is the specific reason for the communication to you today. Your patient has chosen to pursue Bio-Identical Hormone Therapy as an option and asked that we contact you to initiate the process.

After the patient fills out IHSP's hormone consultation packet on their medical history and symptoms along with having their hormone levels tested (either by blood or saliva), a consultation may be scheduled with our compounding pharmacist. A typical hormone consultation at InHealth Specialty Pharmacy consists of a 30-60 minute meeting between the patient and a pharmacist. During this meeting, the patient's menopausal/peri-menopausal symptoms, diet, and medical history are discussed. After the meeting, our pharmacist will fax you a summary of the consultation and our suggestions for therapy.

I appreciate the opportunity to help your patient as they continue to pursue Bio-Identical Hormone Replacement therapy. If there are any questions or concerns, please call me at 701-365-6050.

Sincerely,

John Deutsch RPh, PharmD
Owner of InHealth Specialty Pharmacy
